Summary

Software Engineer **Backend-focused** with 2+ years of experience building scalable backend systems and RESTful APIs using **Node.js, NestJS, TypeScript, PostgreSQL, MongoDB, and Redis**. Experienced in designing microservices, database-driven applications, and maintainable software following Clean Code and SOLID principles. Contributed to **10+ production features** and **5+ end-to-end backend services** supporting applications with **50K+ monthly active users**. Passionate about software architecture, distributed systems, and building reliable, high-performance backend solutions.

Experience

Turuq Innovations **Sep 2026 – Present**
Software Engineer *Cairo, Egypt*

- Develop and maintain backend services and RESTful APIs to support logistics, shipping, and order management operations.
- Implement business logic and optimize order processing workflows to improve system reliability and operational efficiency.
- Contribute to backend architecture, service-layer design, and automated testing to maintain code quality and system maintainability.

Trego Tech **Jan 2026 – Sep 2026 (9 months)**
Software Engineer | *Rabta Platform* *New Cairo, Cairo, Egypt*

- Built scalable backend microservices for Rabta, an e-commerce integration platform connecting Amazon, Shopify, Noon, WooCommerce, Zid, and Temu.
- Designed RESTful APIs, business workflows, and PostgreSQL database models using Node.js, NestJS, TypeScript, and TypeORM.
- Developed features across product, inventory, pricing, notification, and organization services following Clean Architecture and SOLID principles.

Anyware Software **Oct 2025 – Jan 2026 (4 months)**
Software Developer *Maadi, Cairo, Egypt*

- Developed backend systems for enterprise clients including Dunkin' Donuts (Gong Cha), Garnell, and Pable & Abdo.
- Built RESTful APIs and business modules using C#, .NET, Node.js, Express.js, SQL Server, and MongoDB.
- Delivered production features, optimized databases, and collaborated within an Agile development team.

Noubodiez Digital Agency **Aug 2024 – Sep 2025 (1 year 2 months)**
Full Stack JavaScript Developer *Dubai, United Arab Emirates*

- Built full-stack web applications using Node.js, Express.js, React.js, Next.js, and MongoDB.
- Reduced MongoDB query execution time by 65% through schema optimization and indexing.
- Improved code maintainability by 25% and reduced front-end load time by 50% through refactoring and performance optimization.

Skills

Backend: Node.js • NestJS • Express.js • WebSocket • C# • .Net

Databases: PostgreSQL • Drizzle • Prisma • TypeORM • MongoDB • Mongoose • Redis

Frontend: JavaScript • TypeScript • React • Next.js • Angular • Tailwind CSS

Core Concepts: OOP • SOLID • Clean Code • Design Patterns • Data Structures & Algorithms • RESTful APIs • GraphQL • Microservices • Database Design

Tools: Git • GitHub • Docker • Postman • Swagger/OpenAPI • Vercel

Soft Skills: Problem Solving • Analytical Thinking • Communication • Team Collaboration • Time Management

Projects

Turuq - Logistics and Shipping Management Platforms

- Develop and maintain backend services across multiple platforms supporting order management, warehouse operations, courier management, and shipping services.
- Build RESTful APIs and implement business workflows for order processing, shipment tracking, warehouse services, and courier operations.
- Contribute to backend architecture, service-layer design, and database operations to support reliable and maintainable logistics systems.
- **Tech Stack:** Node.js, Express.js, MongoDB, Mongoose, Next.js.

Rabta - Multi-Channel E-Commerce Integration Platform

- Built scalable backend microservices for product management, inventory, pricing, notifications, and organization management using Node.js, NestJS, TypeScript, PostgreSQL, and TypeORM.
- Designed RESTful APIs, business workflows, and database schemas while integrating with marketplaces including Amazon, Shopify, Noon, WooCommerce, Zid, and Temu.
- Implemented business-critical features following Clean Architecture, SOLID principles, and microservices architecture.
- **Tech Stack:** Node.js, NestJS, TypeScript, PostgreSQL, TypeORM, Redis, Docker, Next.js.

Enterprise Business Solutions (Dunkin' Donuts, Gong Cha, Garnell, Pable & Abdo)

- Developed and customized backend systems for enterprise clients across retail and restaurant industries.
- Built RESTful APIs, business modules, and system integrations using .NET, Node.js, Express.js, SQL Server, and MongoDB.
- Implemented business logic, optimized database operations, and delivered production-ready features for multiple enterprise applications.
- **Tech Stack:** C#, .NET, Node.js, Express.js, SQL Server, MongoDB, Next.js.

Education

Higher Institute of Al Alson for Administrative Systems and Information **2020 – 2024**
B.Sc. in Manage information system *Cairo, Egypt*
